Proteins

Amino acid sequence of the *N*-terminal 139 residues of light chain derived from a homogeneous rabbit antibody.
By J.-C. Jaton 1

Comparison of the amino acid sequences of the variable regions of light chains derived from two homogeneous rabbit anti-pneumococcal antibodies.
By J.-C. Jaton 15

Chemical and immunochemical characteristics of tropomyosins from striated and smooth muscle.
By P. Cummins & S. V. Perry 43

The utility of photo-affinity labels as 'mapping' reagents. A study of sub-populations of a specific rabbit antibody by using structurally related photo-affinity reagents.
By R. A. G. Smith & J. R. Knowles 51

Calcium and the assays of human plasma clotting Factor XIII.
By R. D. Cooke & J. J. Holbrook 71

The calcium-induced dissociation of human plasma clotting Factor XIII.
By R. D. Cooke & J. J. Holbrook 79

Molecular heterogeneity of mouse duodenal alkaline phosphatase. Association of lipids and peptides.
By P. R. V. Nayudu & F. B. Hercus 93

Isolation and characterization of a hydroxyproline-containing protein from soluble extracts of the leaves of sandal (*Santalum album* L.).
By U. V. Mani & A. N. Radhakrishnan 147

A collagen-like amino acid sequence in a polypeptide chain of human C1q (a subcomponent of the first component of complement).
By K. B. M. Reid 189

Amino acid sequence of the smaller basic protein from rat brain myelin.
By P. R. Dunkley & P. R. Carnegie 243

Nucleic Acids

Ribonuclease-sensitivity of covalently closed rat liver mitochondrial deoxyribonucleic acid.
By D. M. Lonsdale & I. G. Jones 155

PAGE

Isolation and characterization of mitochondrial deoxyribonucleic acid of *Acanthamoeba castellanii*.
By N. S. Hettiarachchy & I. G. Jones 159

Specificity of anti-nucleoside antibodies (*Short Communication*).
By M. Z. Humayun & T. M. Jacob 313

Lipids

Determination of volatile fatty acids in plasma after ethanolic extraction.
By C. Remesy & C. Demigne 85

The cell-envelope glycolipids of baker's yeast.
By K. Työrinoja, T. Nurminen & H. Suomalainen 133

An electron-capture gas–liquid-chromatographic method for the determination of prostaglandin $F_{2\alpha}$ in biological fluids.
By A. J. F. Wickramasinghe & R. S. Shaw 179

Carbohydrates

The alkali-labile linkage between keratan sulphate and protein.
By J. J. Hopwood & H. C. Robinson 57

The glycoasparagines in urine of a patient with aspartylglycosaminuria.
By R. J. Pollitt & K. M. Pretty 141

The synthesis of peptidoglycan in an autolysin-deficient mutant of *Bacillus licheniformis* N.C.T.C. 6346 and the effect of β-lactam antibiotics, bacitracin and vancomycin.
By J. B. Ward 227

Enzymology

A new nicotinamide–adenine dinucleotide-dependent hydroaromatic dehydrogenase of *Lactobacillus plantarum* and its role in formation of (−)*t*-3,*t*-4-dihydroxycyclohexane-*c*-1-carboxylate.
By G. C. Whiting & R. A. Coggins 35

Purification of human placental alkaline phosphatase. Salt effects in affinity chromatography.
By G. J. Doellgast & W. H. Fishman 103

Aminopeptidases of pea.
By T. C. Elleman 113

PAGE

Kinetics of the activation of rat liver pyruvate kinase by fructose 1,6-diphosphate and methods for characterizing hysteretic transitions.
By H. O. Spivey, W. Flory, B. D. Peczon, J. P. Chandler & R. E. Koeppe 119

Kinetic properties of rat liver pyruvate kinase at cellular concentrations of enzyme, substrates and modifiers.
By W. Flory, B. D. Peczon, R. E. Koeppe & H. O. Spivey 127

Kinetic properties of cerebral pyruvate kinase.
By P. C. Nicholas & H. S. Bachelard 165

Studies on the thiol group of lactose synthetase A protein from human milk and on the binding of uridine diphosphate galactose to the enzyme.
By B. J. Kitchen & P. Andrews 173

The kinetics of coupled enzyme reactions. Applications to the assay of glucokinase, with glucose 6-phosphate dehydrogenase as coupling enzyme.
By A. C. Storer & A. Cornish-Bowden 205

Deoxycytidylate deaminase. Properties of the enzyme from cultured kidney cells of baby hamster.
By H. A. Rolton & H. M. Keir 211

Thermal inactivation studies of normal and variant human erythrocyte carbonic anhydrases by using a sulphonamide-binding assay.
By W. R. A. Osborne & R. E. Tashian 219

Kinetics of alkaline phosphatase from pig kidney. Mechanism of activation by magnesium ions.
By J. Ahlers 257

PAGE

The kinetics of oxidation of ferroperoxidase by molecular oxygen. A model of a terminal oxidase.
By C. F. Phelps, E. Antonini, G. Giacometti & M. Brunori 265

Alkaline phosphatase from pig kidney. Method of purification and molecular properties.
By E. D. Wachsmuth & K. Hiwada 273

Catalytic properties of alkaline phosphatase from pig kidney.
By K. Hiwada & E. D. Wachsmuth 283

Alkaline phosphatase from pig kidney. Microheterogeneity and the role of neuraminic acid.
By K. Hiwada & E. D. Wachsmuth 293

Kinetics of carbon monoxide binding and electron transfer by cytochrome *c* polymers.
By S. Dupré, M. Brunori, M. T. Wilson & C. Greenwood 299

Specificity of glycerol kinase (*Short Communication*).
By R. Eisenthal, R. Harrison & W. J. Lloyd 305

Distribution of reducing equivalents on xanthine oxidase molecules and the rates of the intramolecular electron-transfer reactions (*Short Communication*).
By R. C. Bray, D. J. Lowe & M. J. Barber 309

Action of dimeric hybrids of native and selectively alkylated ribonuclease A on double-stranded ribonucleic acid (*Short Communication*).
By G. D'Alessio, J. Doskočil & M. Libonati 317

Intermolecular Organization

Changes in the number of binding sites for ribonucleic acid polymerase in chromatin of WI-38 fibroblasts stimulated to proliferate.
By B. T. Hill & R. Baserga 27

Contents of Volume 141, No. 2

PAGE

Proteins

The isolation of an easily reversible post-synaptic toxin from the venom of a sea snake, *Laticauda semifasciata*.
By N. Maeda, K. Takagi, N. Tamiya, Y.-M. Chen & C.-Y. Lee 383

PAGE

The primary structure of the toxin Laticauda semifasciata III, a weak and reversibly acting neurotoxin from the venom of a sea snake, *Laticauda semifasciata*.
By N. Maeda & N. Tamiya 389

PAGE

The nature of the multiple forms of cytoplasmic aspartate aminotransferase from pig and sheep heart.
By R. John & R. Jones 401

Purification and subunit structure of legumin of *Vicia faba* L. (broad bean).
By D. J. Wright & D. Boulter 413

Comparison of the biliproteins from two strains of the thermophilic cyanophyte *Synechococcus lividus*.
By R. MacColl, M. R. Edwards, M. H. Mulks & D. S. Berns 419

The isolation and amino acid sequence of an adrenocorticotrophin from the pars distalis and a corticotrophin-like intermediate-lobe peptide from the neurointermediate lobe of the pituitary of the dogfish *Squalus acanthias*.
By P. J. Lowry, H. P. J. Bennett, C. McMartin & A. P. Scott 427

Structural studies of α-melanocyte-stimulating hormone and a novel β-melanocyte-stimulating hormone from the neurointermediate lobe of the pituitary of the dogfish *Squalus acanthias*.
By H. P. J. Bennett, P. J. Lowry, C. McMartin & A. P. Scott 439

The reduction of carboxymethyl-cytochrome *c* by chromous ions.
By T. Brittain, M. T. Wilson & C. Greenwood 455

Autolysis of glycoproteins in rat kidney lysosomes *in vitro*. Effects on the isoelectric focusing behaviour of glycoproteins, arylsulphatase and β-glucuronidase.
By A. Goldstone & H. Koenig 527

Salt-soluble elastin from lathyritic chicks.
By B. C. Sykes & S. M. Partridge 567

Isolation of salt-soluble elastin from ligamentum nuchae of copper-deficient calf.
By A. H. Whiting, B. C. Sykes & S. M. Partridge 573

Nucleic Acids

The behaviour of oligodeoxynucleotides on thin-layer chromatography on polyethyleneimine-cellulose and ion-exchange paper electrophoresis. Applications in fractionating and sequencing terminally labelled oligodeoxynucleotides.
By A. Morrison & K. Murray 321

PAGE

The behaviour of heterogeneous nuclear ribonucleic acid in partially and completely denaturing conditions.
By M. E. Bramwell 477

Structures for polyinosinic acid and polyguanylic acid.
By S. Arnott, R. Chandrasekaran & C. M. Marttila 537

Fidelity of deoxyribonucleic acid polymerases from normal and leukaemic human cells in polydeoxynucleotide replication (*Short Communication*).
By B. I. S. Srivastava 585

Lipids

A more detailed study of bile salt evolution, including techniques for small-scale identification and their application to amphibian biles.
By I. G. Anderson, G. A. D. Haslewood, R. S. Oldham, B. Amos & L. Tökés 485

Carbohydrates

Interactions of an intact proteoglycan and its fragments with basic homopolypeptides in dilute aqueous solution.
By R. A. Gelman, J. Blackwell & M. B. Mathews 445

The structure and composition of cartilage keratan sulphate.
By J. J. Hopwood & H. C. Robinson 517

Small Molecules

Electron-spin-resonance studies of the structure and formation of bacterial diazodiphenoquinone pigments (*Short Communication*).
By P. Ashworth 577

Enzymology

The characterization of myosin–product complexes and of product-release steps during the magnesium ion-dependent adenosine triphosphatase reaction.
By C. R. Bagshaw & D. R. Trentham 331

The magnesium ion-dependent adenosine triphosphatase of myosin. Two-step processes of adenosine triphosphate association and adenosine diphosphate dissociation.
By C. R. Bagshaw, J. F. Eccleston, F. Eckstein, R. S. Goody, H. Gutfreund & D. R. Trentham 351

PAGE

Kinetics of the hydrolysis of *N*-benzoyl-L-serine methyl ester catalysed by bromelain and by papain. Analysis of modifier mechanisms by lattice nomography, computational methods of parameter evaluation for substrate-activated catalyses and consequences of postulated non-productive binding in bromelain- and papain-catalysed hydrolyses.
By C. W. Wharton, A. Cornish-Bowden, K. Brocklehurst & E. M. Crook 365

A new assay procedure for monoglyceride acyltransferase.
By V. J. Short, D. N. Brindley & R. Dils 407

Pyridoxal phosphate-sensitized photoinactivation of glutamate decarboxylase from *Clostridium perfringens*.
By I. Cozzani, C. Santoni, G. Jori, G. Gennari & A. M. Tamburro 463

The partial purification and characterization of cytosol alcohol dehydrogenase from *Astasia*.
By R. Morosoli & N. Bégin-Heick 469

The specificity of the S_1 subsite of papain.
By M. R. Alecio, M. L. Dann & G. Lowe 495

A kinetic and fluorimetric investigation of papain modified at tryptophan-69 and -177 by *N*-bromosuccinimide.
By G. Lowe & A. S. Whitworth 503

PAGE

Kinetics and mechanism of catalysis by proteolytic enzymes. A comparison of the kinetics of hydrolysis of synthetic substrates by bovine α- and β-trypsin.
By D. V. Roberts & D. T. Elmore 545

Affinity chromatography of bovine trypsin. A rapid separation of bovine α- and β-trypsin.
By G. W. Jameson & D. T. Elmore 555

Purification of rat liver *S*-adenosyl-L-methionine decarboxylase (*Short Communication*).
By A. E. Pegg 581

The existence of an electrophilic component in the reaction catalysed by triose phosphate isomerase (*Short Communication*).
By M. R. Webb & J. R. Knowles 589

Induction of *N*-acetylglucosamine kinase in yeast (*Short Communication*).
By A. Bhattacharya, M. Puri & A. Datta 593

NN'-Diacetylchitobiase activity in Tay–Sachs disease and Sandhoff's disease (*Short Communication*).
By J. L. Stirling 597

Kinetics of irreversible enzyme inhibition by an unstable inhibitor (*Short Communication*).
By E. T. Rakitzis 601

Hexose phosphate synthase in trimethylamine-grown bacterium 2B2, a facultative methylotroph (*Short Communication*).
By R. B. Cox & L. J. Zatman 605

Contents of Volume 141, No. 3

PAGE

Proteins

Heterogeneity in tissue ferritins displayed by gel electrofocusing.
By J. W. Drysdale 627

A plasma protein fractionation procedure for use in studies of protein metabolism. Its application to the measurement of synthesis rates of two α_1-glycoproteins and other serum proteins in the rat.
By J. Ho, K. N. Jeejeebhoy & R. H. Painter 655

PAGE

Calcium and thiol reactivity of human plasma clotting factor XIII.
By R. D. Cooke, T. C. Pestell & J. J. Holbrook 675

Calcium-induced dissociation of human plasma factor XIII and the appearance of catalytic activity.
By R. D. Cooke 683

PAGE

A mass-spectrometric sequence study of the enzyme ribitol dehydrogenase from *Klebsiella aerogenes*.
By H. R. Morris, D. H. Williams, G. G. Midwinter & B. S. Hartley 701

Phosphorylation of troponin and the effects of interactions between the components of the complex.
By S. V. Perry & H. A. Cole 733

The formation of iron-binding fragments of hen ovotransferrin by limited proteolysis.
By J. Williams 745

The amino acid sequence of plastocyanin from *Vicia faba* L. (broad bean).
By J. A. M. Ramshaw, M. D. Scawen & D. Boulter 835

Analysis of the code relating sequence to conformation in globular proteins. Theory and application of expected information.
By B. Robson 853

Analysis of the code relating sequence to conformation in globular proteins. Development of a stereochemical alphabet on the basis of intra-residue information.
By B. Robson & R. H. Pain 869

Analysis of the code relating sequence to conformation in globular proteins. An informational analysis of the role of the residue in determining the conformation of its neighbours in the primary sequence.
By B. Robson & R. H. Pain 883

Analysis of the code relating sequence to conformation in globular proteins. The distribution of residue pairs in turns and kinks in the backbone chain.
By B. Robson & R. H. Pain 899

A set of surface proteins common to the circulating human platelet and lymphocyte (*Short Communication*).
By M. J. A. Tanner, D. H. Boxer, J. Cumming & J. Verrier-Jones 909

Nucleic Acids

Identical 3′-terminal octanucleotide sequence in 18S ribosomal ribonucleic acid from different eukaryotes. A proposed role for this sequence in the recognition of terminator codons.
By J. Shine & L. Dalgarno 609

PAGE

Studies on the 3′-terminal sequences of the large ribosomal ribonucleic acid of different eukaryotes and those associated with 'hidden' breaks in heat-dissociable insect 26S ribonucleic acid.
By J. Shine, J. A. Hunt & L. Dalgarno 617

Studies on the fractionation of total transfer ribonucleic acid and purification of an alanine transfer ribonucleic acid from chick embryo.
By M. P. J. S. Anandaraj & J. D. Cherayil 647

Carbohydrates

X-ray fibre diffraction of cartilage proteoglycan aggregates containing hyaluronic acid (*Short Communication*).
By E. D. T. Atkins, T. E. Hardingham, D. H. Isaac & H. Muir 919

Enzymology

The binding of oxidized and reduced nicotinamide–adenine dinucleotides to bovine liver uridine diphosphate glucose dehydrogenase.
By P. A. Gainey & C. F. Phelps 667

Ribitol dehydrogenase from *Klebsiella aerogenes*. Purification and subunit structure.
By S. S. Taylor, P. W. J. Rigby & B. S. Hartley 693

Phosphonomethyl analogues of phosphate ester glycolytic intermediates.
By H. B. F. Dixon & M. J. Sparkes 715

The interaction of the phosphonate analogue of 3-phospho-D-glycerate with phosphoglycerate kinase.
By G. A. Orr & J. R. Knowles 721

Properties of the phosphonomethyl isosteres of two phosphate ester glycolytic intermediates.
By D. Stribling 725

Dehydrogenation of a phosphonate substrate analogue by glycerol 3-phosphate dehydrogenase.
By P. R. Adams, R. Harrison & T. D. Inch 729

Studies of triose phosphate isomerase by hydrogen exchange.
By C. A. Browne & S. G. Waley 753

PAGE

Mechanism of activation of pyruvate dehydrogenase by dichloroacetate and other halogenated carboxylic acids.
By S. Whitehouse, R. H. Cooper & P. J. Randle 761

Affinity chromatography of nicotinamide nucleotide-dependent dehydrogenases on immobilized nucleotide derivatives.
By I. P. Trayer & H. R. Trayer 775

A kinetic analysis of enzyme systems involving four substrates.
By K. R. F. Elliott & K. F. Tipton 789

Kinetic studies of bovine liver carbamoyl phosphate synthetase.
By K. R. F. Elliott & K. F. Tipton 807

Product inhibition studies on bovine liver carbamoyl phosphate synthetase.
By K. R. F. Elliott & K. F. Tipton 817

A steady-state kinetic model of butyrylcholinesterase from horse plasma.
By K.-B. Augustinsson, T. Bartfai & B. Mannervik 825

Mutationally altered rate constants in the mechanism of alkaline phosphatase.
By S. E. Halford & M. J. Schlesinger 845

PAGE

Thiol-blocking reagents and phosphate acetyltransferase catalysis, and the assessment of protection by adsorbed molecules (*Short Communication*).
By S. A. Kyrtopoulos & D. P. N. Satchell 905

A comparison of two methods for fitting the integrated Michaelis–Menten equation (*Short Communication*).
By I. A. Nimmo & G. L. Atkins 913

Hydrolysis of bradykinin and its higher homologues by angiotensin-converting enzyme (*Short Communication*).
By F. E. Dorer, J. W. Ryan & J. M. Stewart 915

Intermolecular Organization

Characterization of gastric mucoproteins isolated by equilibrium density-gradient centrifugation in caesium chloride.
By B. J. Starkey, D. Snary & A. Allen 633

Conformational changes in gastric mucoproteins induced by caesium chloride and guanidinium chloride.
By D. Snary, A. Allen & R. H. Pain 641
